tanti essempli, che soddisfacessino
mi sono ingegnato di ritrovare qu
nuova inventione de lettere, e met
stampa, le quali tanto se avvicinano all
a mano, quanto capeva il mio ingegn
puntualmente in tutto no te rispono**

Description:

Divenire is derived from a custom typeface designed for the Partito Democratico (Italian Democratic Party) and used in their political communication. It has variation of tension in its design, alternating curved and almost straight elements. The glyphlist includes many alternatives like a set of odd punctuation marks: the famous 'interrobang' and others, starting from Hervé Bazin's work.

Designed by:

Luciano Perondi

Production Years:

2012–2014

tagliare un poco di essa punta temperata per dritto, e senza sguinzo, perciò che se la fosse tutta

Bold 18/23

E perché impossibile era de mia mano porger tanti essempli, che soddisfacessino a tutti, mi sono ingegnato di ritrovare questa nuova invention de littere, e metterle in stampa, le quali tanto se

Italic 11/15

All these shapes you must have of several Sizes and of several Cuts. You must have them of several sizes, as well because you may have several sizes of work, as for that it sometimes falls out that one piece of work may have many parts in it joined and fitted to one another, some of them great, and others small; And you must have them of several Cuts, because the Rough-tooth'd File cuts faster than the Bastard-tooth'd File, the Fine tooth'd File faster than the Smooth-tooth'd File. The Rough or Course-tooth'd File (which if it be large, is called a Rubber) is to take off the unevenness of your work which the Hammer made in the Forging; the Bastard-tooth'd file is to take out of your work, the deep cuts, or file-strokes, the Rough-file made; the Fine-tooth'd file is to take out the cuts, or file-strokes, the Bastard-file made; and the Smooth-file is to take out those cuts, or file-strokes, that the Fine file made. Thus you see how the Files of several Cuts succeed one another, till your Work is so smooth as it can be filed. You may make it yet smoother with Emerick, Tripoli, & c. But

Medium 12/16

But if it do not so comply, that is, if it be not square to the first side which you will know by the riding of the inside of the Tongue upon one of the Edges; or some other part between the Edges, you must, with the Foreplane Rank-set, plain away that Stuff which bears off the inside of the Tongue from complying all the way with it. But if the Risings be great, you may, for quickness, hew away the Risings with the Hatchet: but then you must have a care you let not the edge of your Hatchet cut too deep into the Stuffs lest you either spoil your Stuff, by making it unfizeable, if it be already small enough; or if it have substance enough, make your self more labour to get out those Hatchet-strokes with the Plane than you need. Then take off the roughness the Hatchet made with the Fore-plane Rank-set, then fine set, and last of all with the Jointer, or Smoothing-plane: So is the second side also finished. To work the third side, set the Oval of the Gage exactly to that width from the Gage, that you intend stand too far from the Tooth, hold the Oval in your Hand, and knock the Tooth-end of your

ExtraBold Italic 12/16

It is usual, and also very convenient, for any person before he begins to Erect a Building, to have Designs or Draughts drawn upon Paper or Velum, and also if it be a large Building, to have a Model of it made in Wainscot, in which Designs and Model, the Ground Plat or Ichnography of each Floor or Story,

Black 28/36

Building, to have a Model of it made in Wainscot, in which Designs and Model, the Ground Plat or Ichnography of each Floor or Story, is delineated and represented; As also the fashion and form of

Medium 10/16 and before you can take out those deep scratches with your finer cut Files, those places where the Risings were when your work was forged, may become dents to your Hammer dents; therefore, file not those Risings quite so low, as the dents the Hammer made, but only so low as that the scratches the Rough-file makes may lie as low, or deep in your work, as your Hammer dents do; for then, when you come with your smoother Cut Files, after your Rough-file, the scratches of your Rough-file, and your Hammer-strokes, or dents, may both come out together. But to do this with greater certainty, hold your File so, that you may keep so much of the length of your File as you can to rub, range, (or, as near range as you can) upon the length of your work; for so shall the File enter upon the second Rising on your work, before

Italic 12/20 *Oltra di questo, bisogna nela fine del sguinzo, cioè ne l'ultima parte dela punta temperata, tagliare un poco di essa punta temperata per dritto, e senza sguinzo, perciò che se la fosse tutta in sguinzo sarebbe troppo debile, tal che per aventura farebbe la lettera bavosa, ma a questo modo facendo sempre le penne gettanno benissimo. Poi se qualch'uno, che havesse la mano leggiera, volesse che la tinta tinta più facilmente scorresse, potrà con la punta del temperatoio fendere la punta del vomero de la penna in due parti eguali, cominciando la fessura poco poco di sopra dal sguinzo, et hara quello*

Black 18/25

Dele varie sorti de littere poi, che in questo Trattatello troverai, se io ti volessi ad una per una descrivere tutte le sue ragioni, saria troppo longo processo. Ma tu havendo volunta de' imparare, ti terrai inanzi questi exempietti, et sforcerati imitarli quanto potrai, che in ogni modo seguendo quelli, se non in tutto, almeno in gran parte te adiuterano conseguire quella sorte di littera, che più in esso ti diletterà. Piglialo adunque, et con felici

Bold Italic 11/18 ***Letto che haverai la penna, et il temperatoio, prima guarderai quella parte di essa penna, che suol stare verso l'animale, la quale ha uno canaletto, che va, da onde termina il rotondo fino a la sommità di lei, e da questa parte farai uno taglio circa uno dito o poco più sopra il principio di essa, cioè sopra quella parte, che sta fitta nell'ala, e per esso potrai trar la midolla de la penna, cosa che si fa agevolmente con la cima, che si taglia uia dala penna. E dico che'l taglio sia da la parte del canaletto, perciò che comunemente le penne non sonno dritte, ma pendeno verso detta parte, benché alcune pendono anchora verso la parte dextra, e però in questo bisogna haver cura,***
